

## **Technical data sheet**

# Damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 3.2 m<sup>2</sup>
- Torque motor 16 Nm
- Nominal voltage AC/DC 24 V
- Control Open/close, 3-point
- Running time motor 20 s

## **Technical data**

Electrical data       Nominal voltage       AC/DC 24 V         Nominal voltage frequency       50/60 Hz         Nominal voltage range       AC 19.228.8 V / DC 21.628.8 V         Power consumption in operation       4 W         Power consumption in rest position       0.5 W         Power consumption for wire sizing       6.5 VA         Power consumption for wire sizing note       Imax 8.2 A @ 5 ms         Connection supply / control       Cable 1 m, 3 x 0.75 mm²         Parallel operation       Yes (note the performance data)         Functional data       Torque motor       16 Nm         Direction of motion motor       selectable with switch 0 (ccw rotation) / rotation)         Manual override       with push-button, can be locked         Angle of rotation note       can be limited on both sides with adjust. mechanical end stops         Running time motor       20 s / 90°         Sound power level, motor       55 dB(A)         Mechanical interface       Universal shaft clamp reversible 1020         Position indication       Mechanically, pluggable         Safety       Protection class IEC/EN       III Safety Extra-Low Voltage (SELV)

Position indication         Mechanically, pluggable           Safety         Protection class IEC/EN         III Safety Extra-Low Voltage (SELV)	
Safety         Protection class IEC/EN         III Safety Extra-Low Voltage (SELV)	mm
Protection class UL UL Class 2 Supply	
Degree of protection IEC/EN IP54	
Degree of protection NEMA/UL NEMA 2	
Enclosure UL Enclosure Type 2	
EMC CE according to 2014/30/EU	
Certification IEC/EN IEC/EN 60730-1 and IEC/EN 60730-2-1	4
Certification UL cULus according to UL60730-1A, UL60 14 and CAN/CSA E60730-1:02	730-2-
Certification UL note The UL marking on the actuator depend production site, the device is UL-complia any case	
Mode of operation Type 1	
Rated impulse voltage supply / control 0.8 kV	
Control pollution degree 3	
Ambient temperature -3050 °C	
Storage temperature -4080°C	
Ambient humidity Max. 95% r.H., non-condensing	
Servicing maintenance-free	
Weight Ueight 1.1 kg	

Safety notes	
$\wedge$	<ul> <li>The device must not be used outside the specified field of application, especially no in aircraft or in any other airborne means of transport.</li> </ul>
	<ul> <li>Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the actuator and that is ensured that the ambient conditions remain at any time within the thresholds according to the data sheet.</li> </ul>
	<ul> <li>Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.</li> </ul>
	<ul> <li>The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.</li> </ul>
	Cables must not be removed from the device.
	<ul> <li>To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.</li> </ul>
	<ul> <li>The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.</li> </ul>
Product features	
Simple direct mounting	Simple direct mounting on the damper shaft with a universal shaft clamp, supplied wit an anti-rotation device to prevent the actuator from rotating.
Manual override	Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

## Accessories
